## $\mathbf{B}$

• bisect\_map() (in module powerlaw)

# $\mathbf{C}$

- ccdf() (in module powerlaw)
  - (powerlaw.Distribution method)
  - (powerlaw.Fit method)
- cdf() (in module powerlaw)
  - (powerlaw.Distribution method)
  - (powerlaw.Fit method)
- checkunique() (in module powerlaw)
- <u>cumulative distribution function() (in module powerlaw)</u>

# Assignment Project Exam Help Distribution (class in powerlaw) Project Exam Help Distribution (class in powerlaw)

# F https://powcoder.com

• find xmin() (powerlaw.Fit method)
Add WeChat powerlaw.Distribution method)

Add WeChat powerlaw.Distribution method)

# G

• generate random() (powerlaw.Distribution method)

#### Ι

- <u>in\_range() (powerlaw.Distribution</u> method)
- <u>initial\_parameters() (powerlaw.Distribution</u> method)
- is\_discrete() (in module powerlaw)

# $\mathbf{K}$

• KS() (powerlaw.Distribution method)

# $\mathbf{L}$

- <u>likelihoods() (powerlaw.Distribution method)</u>
- loglikelihood\_ratio() (in module powerlaw)

• <u>loglikelihoods() (powerlaw.Distribution</u> method)

(powerlaw.Fit method)

### $\mathbf{N}$

• <u>nested\_distribution\_compare()</u> (powerlaw.Fit method)  nested\_loglikelihood\_ratio() (in module powerlaw)

#### P

- parameter\_range() (powerlaw.Distribution method)
- pdf() (in module powerlaw)
  - (powerlaw.Distribution method)
  - (powerlaw.Fit method)
- plot\_ccdf() (powerlaw.Distribution method)
  - (powerlaw.Fit method)

- plot cdf() (in module powerlaw)
  - (powerlaw.Distribution method)
  - (powerlaw.Fit method)
- plot pdf() (in module powerlaw)
  - (powerlaw.Distribution method)
  - (powerlaw.Fit method)
- powerlaw (module)
